x-rays and exam
Moderate Production
- 12:00** Pediatric Patient Prophylaxis, F2,
F2, x-rays and exam
Moderate Production

Can you see the organization of this assisted hygiene model? The assistant is available to greet, seat, take x-rays and write down any probing necessary from 8:00 – 8:30 the assistant is available. When you have a planned schedule this is a seamless process!

This is just an example of what you can do. It may be important at this point to have an expert guide you through this process when putting the pieces together.
